Subject: Nuclear waste dump

**Part of Records Package / Supplement / Correction**

I find it hard to believe that someone supposedly educated in the effects of nuclear waste with a job entailing safety of large numbers of people would continue to recommend Yucca Mt. for depositing nuclear waste. To my knowledge, you have not yet reviewed any final impact system, or been given recommendations regarding the transport of nuclear waste from many parts of our nation.

Surely, there should be requirements other than membership in some political party that would make them eligible to perform in a manner protective of people who are entitled to the wisest, safest counsel and action in office as I believe you are.

I hope I am mistaken in my belief that you have had inadequate counsel and have not given consideration to other possible sites. If so, I apologize. But until such time as more thorough research has been done for this problem, please, abandon your support of Yucca Mt. as a nuclear waste depository.
